Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲   Form elements do not have associated labels   ⌄

Additional items to manually check (11) — These items address areas which an   ⌄ automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.
